I build reliable backend systems and clean mobile/web interfaces — from **.NET services** and **Clean Architecture APIs** to **Flutter apps** and **Angular front-ends**. Comfortable working across the full stack, from database design to CI/CD deployment.

WHAT I DO

.NET Development

Backend services & APIs with Clean Architecture and CQRS (MediatR).

Mobile Apps (Flutter)

Cross-platform mobile UI screens and features.

Web Development

Front-end & full-stack apps with Angular, React, Node.js.

Database Design

Relational data modelling with SSMS and SQL Server.

API Integration

REST APIs, payment gateways & third-party tools.

DevOps & Deployment

CI/CD pipelines and Azure App Service via GitHub Actions.

EXPERIENCE

Software Engineer

SELECTED PROJECTS

GS Marketing Tech Ecosystem

2025 – Present

Full-stack exhibition & trade fair management platform spanning 2 backends, 3 web portals and 3 mobile apps for visitors, staff and admin teams — built as a Modular Monolith with Clean Architecture and CQRS. Features real-time admin dashboards with embedded Power BI analytics, QR-based venue entry, and integrated AuroPay payments, AiSensy WhatsApp and SendGrid notifications via Hangfire background jobs.
